Got Moles?

Mole Trap Rental

By: Ryan Fink, Ag/Wildlife Specialist

As every homeowner knows, moles live in underground burrows that can leave a destructive maze of pathways in our yards, gardens, and flowerbeds.

When trying to control mole damage, the only practical method is trapping. There are several different styles of traps that are produced. The Muskingum Soil and Water Office now offers one of the most effective types for rent. It is professional grade that is extremely easy to use.

These traps rent for \$5.00 for two weeks. There is also a \$20.00 refundable deposit required on each trap. Landowners have had a good success with these traps. If you are interested or have any other questions please contact our office at 454-2027 or 454-2767.

All SWCD & NRCS programs and services are offered on a non-discriminatory basis, without regard to race, color, national origin, age, sex, religion, political beliefs, sexual orientation, marital status, or handicap.
